Product Description

Flat iron full-automatic looping machine (looping + butt welding)

Lampshade is a necessary equipment in the industry. It can be fully automatic looping + butt welding. Or it can only circle automatically. It can also be a semicircle of a circle or an arc.
The material can be round bar or flat iron, which can be used for multiple purposes.

Loop + butt welding, multi-functional, fully automatic.
Application scope

Servo circular butt welding machine is used in lampshade industry

Nickname

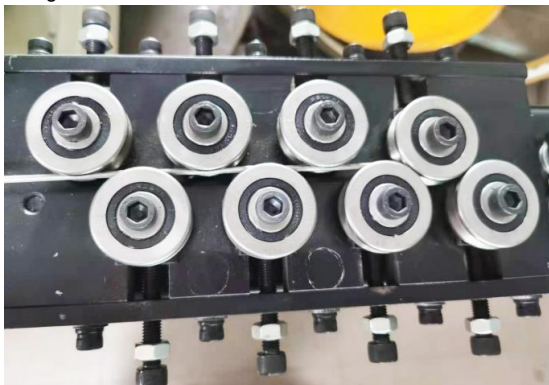

All in one machine for circle and butt welding,
Automatic steel circle o and bending with welder wire ring making butt welding machine
Circle making and butt welding machine
2-8MM Grill Fan Guard Wire Ring Butt Welding Making Machine

Performance characteristics

1. Servo feeding, fast looping speed, hydraulic cutter, simple and fast, great strength. Making circle + butt welding can be completed at one time, saving time, labor and labor.
2. The whole machine CNC lathe + CNC milling has good coordination and precision. It is more guaranteed than similar products, faster and more efficient.
3. PLC programming + man-machine interface, simple debugging, Omron 2000 pulse encoder, more accurate identification. Beginners are easy to get started. It also has forward and backward, automatic and manual functions, which is convenient for debugging. Debugging OK is direct and automatic without human supervision.

Structural details are displayed one by one:

1. Horizontal and vertical two groups of straightening guard wheel, thickened and hardened, double ball. The safety wire is well straightened and more durable.

2. 4 groups, 8 wire feeding forming wheels, with large force, stability and wear resistance. There are only 3 groups and 6 similar machines from other manufacturers. Moreover, the processing is accurate, and the surface of the trunking is specially smooth.

4 sets, 8 forming feeding wheels
